Full Stack Developer specializing in React, Next.js, Node.js, MongoDB, and React Native. Experienced in building scalable web and mobile applications with optimized performance and clean UI. Resolved workflow bottlenecks by delivering high-quality features that enhanced user experience and optimized business processes.

Work Experience

Full Stack Developer

Cyberfort Tech | Delhi

May 2025 - Present

- Developed and launched two production websites, including a Travel Platform and enhancements for the CyberfortTech corporate website, resulting in improved user engagement and increased brand presence.
- Built a React Native mobile application that reduced internal manual workflows by 30%
- Engineered scalable APIs with Node.js & Express, improving backend response time by 25%
- Developed optimized and reusable UI components using React/Next.js, improving page load speed by 40%
- Collaborated with cross-functional teams across 10+ sprints, delivering features consistently on schedule

Full Stack Developer Intern

Orangus Pvt. Ltd.

Oct 2024 - Apr 2025

- Assisted in building and testing production-level web applications using React and Node.js, contributing to increased efficiency and reduced development time.
- Fixed 20+ UI/UX bugs, boosting system performance and reducing client-reported issues
- Contributed to component-based architecture, reducing duplicate code by 35%
- Supported deployment processes and managed version control using Git and CI/CD principles, streamlining workflows and reducing deployment time by [number]%

Education

IGNOU

Bachelor of Computer Applications (BCA) | Delhi

Skills

Hard Skills

React.js, Next.js, JavaScript (ES6+), Tailwind CSS, Bootstrap, HTML, CSS, Node.js, Express.js, REST APIs, Authentication (JWT), Django, Python, React Native, API Integration, MongoDB, Mongoose, Git, Postman, Axios, Socket.io, Nodemailer, CI/CD (basic), Performance Optimization, Scalable Architecture, CORs, Backend development

Soft Skills

Certifications

Full Stack Web Development Certification

Sep 2023 - Sep 2024

TechStack Academy (ISO 9001:2008 Certified | Startup India – MSME)Grade: A+

Web Development Completion Certificate

City of Moreton Bay Entrepreneurship & Innovation

Front-End Software Engineering Completion Certificate

Skyscanner

Projects

Multi-Tenant RBAC SaaS Platform (Company, User & Access Management System)

- Tech Stack: Next.js, React, Node.js, Express.js, MongoDB, JWT, Socket.io, Nodemailer, React-Toastify Deployment: Vercel (Frontend), Cloud-Hosted Backend
- Designed and developed a multi-tenant SaaS platform enabling multiple companies to register, authenticate, and operate in isolated environments.
- Implemented a secure company onboarding and authentication flow, allowing organizations to add, manage, and control users through a centralized admin dashboard.
- Built a Role-Based Access Control (RBAC) system with roles including Admin, Manager, Auditor, SOC Analyst, and User, each with granular tool-level permissions.
- Developed dynamic access management, enabling administrators to grant or revoke user permissions in real time without redeployment.
- Implemented real-time user presence tracking (online/offline status) and live activity updates using Socket.io.
- Created a user activity and audit logging system to track logins, tool access, and system usage for security and compliance.
- Integrated OTP-based authentication and system notifications using Nodemailer.
- Added real-time UI notifications using React-Toastify to enhance user feedback and experience.
- Implemented advanced search and filtering in the Provider Dashboard for company management and in User Management for role and access status.
- Secured backend APIs with JWT-based authentication and role-aware authorization middleware.
- Designed the platform to be scalable, secure, and production-ready, suitable for enterprise and SaaS use cases.

Real-Time Chat Application

- Tech Stack: Next.js, Node.js, MongoDB, Socket.io, JWT
- Developed a real-time messaging system using WebSockets with instant message delivery.
- Implemented online/offline presence indicators, message read status, and live updates.
- Integrated OTP-based authentication using Nodemailer for secure user access.
- Added real-time notifications and instant user search functionality to improve usability.

Notes Management Application

- Tech Stack: Next.js, Node.js, MongoDB, JWT
- Built a secure folder-based notes application with full CRUD functionality.
- Implemented JWT-protected backend routes to ensure authorized access.
- Optimized API performance and improved data handling efficiency.
